Project Work

"Development of Cab Booking App"

Technology and Environment: XCODE 9.2, Swift 3.0, Firebase as Database
Role: Design of UI, Creation of Database
Description: We have created a UBER like app, which allows rider to send a request for cab depending upon its current location. From driver side he may accept that request or may decline it. The database of this project is stored in firebase also the rider has to register an accordingly sign in with that email id and password. Once the ride is accepted we can see that the driver's location is approaching to pick up the rider.
